this is a neat little game. the pixel art, the colors, the lighting, the backgrounds are nice, and music is pleasant. The sprite seems a bit slow and floaty, but that's acceptable with such a small game and I got used to it, the controls are fine and precise enough, there are much worse indie platformers out there, this is definitely better than a flash/browser game. The puzzles are simple but not boring, they got really cool by the end, actually stumped me for a sec. The platforming and traps are well made, the gameplay has a nice flow. I wish there was more levels, and the sprite had better physics, this would be a perfect game. I got through the dungeons in bit less than two hours, and the end screen informed me that I've died 147 times and only found 1 out of 5 gemstones. I had no idea there were more, so one more playthrough.. I really liked the first one and this one is a step up from that, cool graphics and music. For anyone looking for a tough puzzle platformer I recommend Baezult 2.. Recommended if you like challenging platformers -- you'll die, a lot. But death is actually part of the game. 10/10.. Wow, I'm actually surprised by the quality of this game. Really addictive, I thought I'd just check it out and I ended up spending over an hour with it. Really brilliant level designs, it feels like a mixture between Spelunky and Super Meat Boy. Each section has a checkpoint and infinite respawns: you're tasked with puzzles, platforming or usually both. You need quick fingers/reflexes to play and it's quite difficult

but never unfair. I played it with my PS4 controller and it was wonderful, though I did need to remap it, because I prefer using the D-pad, not the thumb-stick for platforming. All in all, this is really a hidden gem, excellent quality, simple but really well-designed.. I liked the original well enough that I'm happy for the opportunity to toss the creator a fiver. :) Good so far, though note that this is more of a DX remake than a sequel (which is cool by me).. Love this game. If you're a fan of classic platformers then you'll love Baezult 2. Very challenging and fun experience.. Fun, moderately tricky but well paced little puzzle-platformer, with some very obvious inspiration from the old Rick Dangerous games. A bit of trial-and-error is need for some puzzles, but respawning is quick and checkpoints are fairly frequent.
