Absolutely loved this game.

Every level is a little bit different. The story and gameplay feels quite linear; however, looking at the achievements after finishing the game there are multiple endings. That just means I'll need to play it again!. The drag for this reel makes no sense, lvl 3 drag is 24lb and lvl 4 drag is 32lb max line in game is 32lb.... so max you can ever get out of reel is 24lb. in the end you will end up using the dlc rod with a plain reel to get the extra drag pressure thus breaking up the combo.... they need to add a 35-36lb line to make this combo make sense or break the drag steps into 7 lvls instead. Dont get it. It has potential.. So far the game has been very enjoyable, Some aspects are a bit of getting used to but even a novice gamer shouldn't have too much trouble figuring out the basics quickly and getting right into play. I have been looking for an online game like this for quite a while and i think this is the best so far at keeping the boardgame feel while infusing just enough modern computer gaming to make it enjoyable for anyone to play. I can see this game appealing to the hardcore gamer just as much as a novice. The Graphics are perfect and the motion of the charecters as they carry out individual moves whether it be healing another ally or attacking an enemy are enjoyable to watch. That being said i would recomend this game to anyone who enjoys this type of game play as well as anyone who is new to it.. would buy again. The game has the elevators inverted and i cant change it WHA HAPPENE.

This small piece of art is immersive in extreme.

The story, the gameplay, the graphics, the sound - everything is coherent here, no random elements.

By all means try it - it's outstanding in its simplicity.. single-player-MMO-esque cashgrab. Look elsewhere for your D&D RPGs.. pretty cool game, the idea is nice, but they need to improve the storyline and the graphic... controls are a little bit too sensitive and time to time it's eady to do the wrong move... and to swear a lot. But i would suggest to play this game.. The game is short, incomplete. About 2 hours. It was supposed to be part 1 of 3 but the studio supposedly shut down. Has potential.. Takes Darwinia to MP, with classics as CTF, Defend, Payload. Be 12 years old

RIP Trilogy I think

I ask myself, 'RIP Trilogy?'

Vigil is hate, Vigil is death.. It is an OK game but don't play the campaign the naval portion is broken since firing the tomahawk missile from the destroyer breaks the audio and will eventually crash the game and also prevent you from, completeing the level. Also sections of the campaign seem almost impossible without using cheats even on easy. Otherwise its an OK game but definitely not an improvement over Direct Action or even nearly as good. Direct Action has a vastly better quality of the campaign. Seems like Eugen was phoning it in on this one.. More fun than it has any right to be. The real triumph of this game is not the action-filled multiplayer battles or the balanced classes, it is the fact that the developers have figured out how to inject heroin into photons. I find myself waking up in the middle of the night in a cold sweat, my hands twitching to play just one more round of Altitude.

Then, the 3-headed bears come.
