This software is the best thing that ever happened to vr. I wont be able to switch back now XD. Alte: I thought Alte with a well roundedly made character. I couldn't get in situations to use her hyper much but it was fun to have another stock attack value if I self-destructed.

Kyoko: Really fun character to use, awesome piano theme, amazing defence, and a very safe hyper to use.

10/10. Beautiful, charming, fun, interesting game. Great for all ages. Voice acting is excellent, graphics are amazing, and game play is above average. Highly recommend if you like somewhat easy puzzle games, with great immersion.. This game is weird and hard.

10/10. Very good game in my opinion and lots of fun when being chased by the killer. I love it even more now i have a gtx 1070 and i like what they have done with the game since release. I do warn you tho its very addictive so be prepared to spend lots of hours of having fun and heart pounding jump scares when the killer comes out of nowhere especually when the killer is the nurse.. I mean you have to give me credit. I bought the game and idle for 6 minutes just to leave a negative review for this low effort PUBG clone game. Refunding now.. it's free on your phone. Basically, you're a♥♥♥♥♥♥♥♥off ape that goes on multiple rampages backed with a killer dynamic percussion soundtrack. Addicting, challenging, bloody goodness,. This game is for offroaders, what else is there to say. It has plenty of cars that can be tuned to different terrains that consist of mud, sand, rocks, obstacles and more. There are multiple races and different events to attend across the map and each one has something unique.

It isn't really an easy game to play at first and needs some getting used to and the multiplayer funcion doesn't really work for some reason but overall it's an awesome Offroad Racing, it's hard to get better than that, maybe if the multiplayer functioned and the game had free ride mode with some open areas.

Nice Game if you hasn't played fortnite but if you played fortnite then maybe you don't like this peace :). I bust a nut all the time to this game lmao. Addictive, colorful and good old scoring.. A complicated, sophisticated, and education experience, though not for the faint of heart.

(SPOILER WARNING)

Graphics - 10/10

A stunningly gorgeous game, really takes advantage of the murky jungle. Almost impossible to see anything should you venture out into the jungle, but this only adds to the immersion

Story - 10/10

The game seems rather open ended, and despite a short paragraph at the beginning describing why you are here, there does not appear to be much. However, after raiding some low level bandit camps, you discover you can open a hut that contains lara, which is one of the best twists in modern gaming - that this game is actually in the tomb raider series.

Gameplay - 9/10

The intuitive system to load arrows is difficult to understand at first, but makes sense the more you play. You do not use arrows from your inventory - rather, you load them from your inventory into a sort of "quiver", and from there you can fire them. there are many shotguns around, but there does not appear to be a shotgun in the game yet unfortunately.

All in all, this game pays a brilliant homage to its predecessors, specifically the tomb raider series to which it is a sequel, and the S.T.A.L.K.E.R. series, to which it is a spiritual successor. as a fan of the S.T.A.L.K.E.R. series, I could not wait another few years for that teased new game, so for this to come out and so accurately recreate that feeling of terror from such classics as call of pripyat was a breath of fresh air.

FINAL SCORE - 2/10, may bump it up to a 10 if shotgun is added and walking speed is increased. the villagers are not black. What the ♥♥♥♥ kind of DLC is this? Also portugese are OP.
